Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,342,294. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons. Claim 5 of US Patent No. 6,342,294 discloses an article comprising at least one layer of PTFE having a plurality of aggregates connected together by fibrils having an average length of greater than 100 microns, each of the aggregates being defined by a plurality of nodes connected together by the plurality of fibrils having an average length of about 10 to 100 microns.

With regard to claims 4-13, 21-23, the average length range of the fibrils of the US Patent No. 6,342,294 encompasses that of the claimed invention.

Art Unit: 1771

With regard to claims 14-19, 24-26, claims 1 and 5 of US Patent No. 6,342,294 read on the claim limitations.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,688,836 discloses a porous material comprising a PTFE and a heat-meltable resin of which melting point is lower than that of the PTFE, having fibril portions and nodes portions, wherein the fibril portions are mainly of the PTFE and the heat-meltable resin mainly constitutes the node portions and hardly constitutes the fibril portions.
